

## Unit 2: Evolution

### Vocabulary

#### Part 1: Evolution of Life & Evidence for Evolution

Anatomical Homology

Artificial Selection

Biogeography

Cellular Homology

Developmental Homology

Fossil

Half-Life

Molecular Homology

Radiometric Dating

Relative Dating

Vestigial Feature

#### Part 2: Mechanisms of Evolution

Allele

Amino Acid

Artificial Selection

DNA

Fitness

Gene

Gene Fixation

Gene Flow

Gene Frequency

Gene Pool

Genetic Drift

Genotype

Gradualism

Heritable

Macroevolution

Microevolution

Mutation

Natural Selection

Non-random Mating

Nucleotide

Phenotype

Protein

Punctuated Equilibrium

Speciation

Species

Trait
