

Cellular Processes

Vocabulary Inventory

Topic 1: Levels of Organization

Atom
Biosphere
Community
Ecosystem
Molecule
Organ
Organ System
Organelle
Organism
Population
Tissue

Topic 2: Biological atoms & molecules

Carbohydrate
Enzyme
Fat
Nucleic acid
Protein

Topic 3: Cells

Endosymbiosis
Eukaryotic
Multicellular
Prokaryotic
Unicellular

Topic 4: Organelles

Cell Membrane
Cell Wall
Centrosome
Chloroplast
Cytoplasm
Cytoskeleton
Golgi apparatus

Lysosome
Mitochondria
Nucleolus
Nucleus
Ribosome
Rough Endoplasmic Reticulum
Smooth Endoplasmic Reticulum
Vacuole

Topic 5: Reproduction

Anaphase
Asexual
Cell Cycle
Chromatin
Chromosome
Daughter cell
Diploid
Haploid
Interphase
Meiosis
Metaphase
Mitosis
Prophase
Sexual
Sister Chromosome
Telophase

Topic 6: Protein synthesis

Transcription
Translation

Topic 7: Energy transformation

ATP
Cellular Respiration
Photosynthesis
