

## Notes - Biological Atoms and Molecules

The majority of the atoms found inside organisms are of four types:

- Carbon
- Hydrogen
- Oxygen
- Nitrogen

There are also four key biological molecules:

1.) Lipids (also called )

-

-

-

-

-

2.) Proteins

-

-

-

-

-

-

3.) Carbohydrates (sugars and )

- 
- 
- 
- 
- 

4.) Nucleic Acid

-
