

Lab: Modelling Natural Selection

EXPERIMENTAL QUESTION:

Does beak shape
affect fitness in
finches?

Your job:

1. Use the materials provided to plan and conduct an experiment that generates data that can be used to answer the experimental question.
2. Prepare a report summarizing your experiment. Include: Question, Hypothesis, Materials, Procedure, Observations (data), Graph and Conclusion

Lab will be conducted in groups of 4.

Reports are done in partners but it must be a different partner from your last lab!
