

1/10

Quiz #2

Name _____

Electrolytic Cells

1/1 1. Which electrode is the anode? _____

1/1 2. Which electrode is the cathode? _____

3. What reaction takes place at the anode?

1/2 4. What reaction takes place at the cathode?

1/2 5. Calculate the voltage required to operate this cell.

1/2 6. What will happen to the pH at the platinum cathode? _____

1/1 7. What will happen to the pH at the carbon cathode? _____
